Non-renewable resources and the limits of economic Growth

By Gerrit Reeker

GRIN Verlag Mrz 2014, 2014. sonst. Bücher. Book Condition: Neu. 210x148x1 mm. This item is printed on demand - Print on Demand Neuware - Seminar paper from the year 2012 in the subject Economy - Environment economics, grade: 1,0, University of Bergen, language: English, abstract: In 1972 the Club of Rome, a group of economists mainly represented by Donella H. Meadows, published The Limits to growth: The Club of Rome's project on the predicament of mankind, dealing with a prediction of the world's future in terms of the ongoing exploitation of natural non-renewable resources and their impacts on man's living standards. The book made a deep impression on people's minds and initiated a still ongoing discussion among politicians, environmentalists and economists. limits to growth (Meadows, 1972) is the center part of this term paper. The current discussion is not just about the impacts of the ongoing exploitation of non-renewable resources; it is about the methods used by Meadows as well. the objective of this term paper is to show the main results of Meadows' book and analyze in a critical manner the methods used and their implementations, mainly concerning the criticism by William Nordhaus (1992). In order to do so...
