Schools and Road Accidents

By Muhammad Rehan

LAP Lambert Acad. Publ. Aug 2011, 2011. Taschenbuch. Book Condition: Neu. 220x150x6 mm. This item is printed on demand - Print on Demand Neuware - There is a general perception that there are too many accidents near schools. The main objective of this book is to investigate the accident situation near schools in Newcastle and Gateshead. Five years of accident data from 2004 to 2009 in 500 meter radius of each school is used for this study. This data is obtained from TADU database and no data has been obtained from hospital and insurance companies. An aggregated approach of accident analysis is used in this study. GIS techniques along with statistical software are used to carry out the analysis. A more specific objective is to scrutinise the impacts of school safety zone on accidents in Newcastle. The analysis evaluated the frequency of accidents before and after the implementation of safety zone of 64 schools in Newcastle. It was found against the perception of people that there are not too many accidents directly outside the schools. 104 pp. Englisch.
